WORK EXPERIENCE

Komodo Digital

Software Engineer

August 2019 – Present

- Point of contact and lead developer on a Shopify ecommerce website
- Involved in the development of an ASP.NET web application and Xamarin Forms cross platform mobile app
- Expanded Wordpress experience by working with the WP API
- Supporting role in multiple PHP projects
- Lead developer on NodeJS microservice built using Typescript, ExpressJS and Sequelize
- Lead QA engineer on large PHP project.

Junior Software Engineer / QA Engineer

July 2018 – August 2019

- Aided in developing a cross platform react-native project which included using redux and redux sagas to communicate with an external API
- Point of contact for anything related to QA, QC or testing within the company
- Solely developed parts of Wordpress sites which involved using HTML and CSS as well as using PHP to create WP plugins
- Involved in the creation of the company website built using React
- Solely responsible for maintaining over 6 wordpress websites each month which includes performing server health checks and website change requests

Part Time Junior QA Engineer

September 2017 – July 2018

- Worked 2 days a week to test mobile and web applications using mainly exploratory testing and use case testing
- For each QA pass, created test reports for the developers and aided in fixing issues detailed in these reports in both mobile apps and websites
- Helped to maintain a wide variety of wordpress websites.

Apprentice QA Engineer

July 2017 – September 2017

- Worked as an apprentice to test a variety of mobile and web apps
- Explored and learnt best practices for QA and QC
